

As digital touch panel technology enters more class-, conference and congress rooms, traditional writing surfaces are often lost to teachers and presenters. With the BalanceBox® Winx® Touchscreen Whiteboard Frames you get the best of both worlds: Combine your high-tech touch panel technology with the powerful functionalities of traditional whiteboards.

The Winx® 4 and Winx® 6 have three standard size frames for 60" up to 86" touchscreens and flat panels. The frames are fully adjustable around your panel, creating a harmonious ensemble, and include an aluminum bottom tray and a choice to go for either 4 (Winx® 4) or 6 (Winx® 6) enameled steel whiteboard surfaces.

- Winx® 4: 2 double-sided pivoting whiteboard surfaces on the left and right side of the touchscreen.
- Winx® 6: 2 fixed whiteboard surfaces & 2 double-sided pivoting whiteboards, two on each side of the touchscreen.

The Winx® touchscreen whiteboard frame is mounted on the BalanceBox® 650 manual height adjustable mount (no electric connection needed). The high-quality whiteboard surfaces allow the use of magnets for posting notes. The fixed rear whiteboards on Winx® 6 can be unlocked and pivoted away for easy access to the rear of the touch panel.
